

Release Notes ChassisPowerGatingVIP 2015WW25

Summary of Updates:

HSDes	Description	Comment
1204719334	Unexpect assertion firing when reset deasserts.	One more term added to assertion to qualify rising/faling edge.
1404190277	Change to support chassis reset messages for non PGCB IPs in chassis_rst_pkg random mode.	Added additional argument when getting SB registration.

- Remove old scripts for compiling model and replaced with ace.
- Add HIP sequences from HIP Modphy folks. Sequences are there but not embedded with existing ChassisPowerGatingVIP functions.
